

Administration of the Kemerovo Region
ART-Gallery KUZBASS

The art gallery aims to trace the history of the Kuzbass region, from period to period, through art. The works will touch on the industrial power of the Kuzbass Region, the grandeur of Siberian nature, aboriginal identity, and heroes of labour.

The exhibition will be retrospective. It will include masterpieces created over the past 70 years, starting from the 1950s. The historical part of the exhibition will be composed of works from the Kemerovo Regional Museum of Fine Arts (KRMFA), while the modern portion will feature works from the collections of local artists (from Kemerovo and Novokuznetsk).

The exposition will include more than 70 works of fine art (painting, graphic arts, sculpture).

The exhibited masterpieces are examples of work from the Kuzbass Region's leading artists. They include both masters of the older generation, who stood at the origins of professional art (Bachinin, Chernov, Kirchanov, Zevakin, etc.), and those who live and work today, continuing the traditions of their forefathers (Suslov, Chernov, the Spesivtsevs, etc.).
